

**International Course in Management of Civil Infrastructure in Department of Civil  
and Earth Resources Engineering**

**and**

**International Course in Urban and Regional Development in Department of Urban  
Management**

**Graduate School of Engineering, Kyoto University**

**Specialized Subject of Oral Exam I  
for Admission in 2020**

---

**All applicants are required to submit this form.**

At Oral Exam I, applicants take mathematics or one of the five specialized subjects (see page 11-12 in Guidelines for International Applicants to the 2020 Master's Course Program).

- Applicants who intend to take a specialized subject:  
Select one specialized subject that you wish to take using this form. You are allowed to take mathematics at the examination instead of the specialized subject you select from the following subjects.
- Applicants who intend to take mathematics:  
You are allowed to take a specialized subject at the examination instead of mathematics. For this case, you are required to select one specialized subject that you wish to take using this form.

Select one specialized subject from the following five subjects. Note that you are not allowed to take any other specialized subjects once you select one specialized subject in this form.

- Structural Mechanics                       Hydraulics                       Soil Mechanics
- Planning and Management                       Earth Resources Engineering

Prior to submitting this form, applicants should contact their chosen supervisor and the form must be signed by the supervisor.
